ANBEFALTE AKSJER
Storebrand ut, ingen inn

Porteføljen var ned 0.2% fra mandag formiddag forrige uke til mandag formiddag i dag. I samme periode var OSEBX ned 1.1%. Så langt i 2026 er porteføljen opp 1.8%, mens OSEBX er opp 23.1%. Denne uken tar vi Storebrand ut av porteføljen, mens ingen nye aksjer tas inn.

Porteføljeutvikling. Forrige uke var det Salmar (+7.2%), Mowi (+4.2%) og Nordic Semiconductor (+1.3%) som ga best avkastning av aksjene i porteføljen. Elkem (-7.2%), Storebrand (+2.8%) og DOF Group (-2.8%) ga den svakeste avkastningen. De sterkeste europeiske sektorene forrige uke var defensivt konsum, industri og finans, mens helse, energi og forsyning var de svakeste. Mandag stiger oljeprisen igjen etter at Trump avslo Irans forslag om å gjenåpne Hormuzstredet, og energisektoren leder dermed oppgangen i markedet i dag. Denne uken tar vi Storebrand ut etter 20 uker i porteføljen. Etter at aksjen har underprestert mot børsen den siste måneden, velger vi å sikre gevinsten.

De viktigste makrohendelsene denne uken er en rekke nøkkeltall fra det amerikanske arbeidsmarkedet, herunder sysselsettingsvekst, lønnsvekst og arbeidsledighet. Konsensusforventningene er at arbeidsmarkedet fortsatt holder seg sterkt. I tillegg publiseres PCE-inflasjonstall fra USA og KPI-tall fra eurosonen, hvor forventningen er at inflasjonen i begge økonomiene fortsatt er høyere enn sentralbankenes inflasjonsmål.

Porteføljen består av følgende aksjer: Aker BP, B2 Impact, Borregaard, DOF Group, Elkem, Equinor, Kitron, Mowi, Nordic Semiconductor, Salmar.

I vår beregning av avkastning baserer vi inn- og utkursen på åpningskursene mandag morgen. Porteføljen er likevektet og ukens avkastning reflekterer dermed et samlet gjennomsnitt av kursutviklingen for alle aksjene gjennom uken. For selskaper på OBX-indeksen bruker vi gjennomsnittlig kurs frem til kl. 10.00 på mandag, mens vi for andre aksjer bruker gjennomsnittet frem til kl. 12.00. Avkastningen for OSEBX beregnes fra kurs kl. 10.00 mandag.

Aker BP (AKRBP)

- Aker BP gir porteføljen en sikring dersom uroen i Midtøsten vedvarer utover høsten.
- Aker BP har sterk operasjonell historikk og vi ser potensial for en videre re-prising av aksjen dersom Yggdrasil og Valhall-Fenris når sail-away til høsten, noe som muliggjør produksjonsstart i 2027e og reduserer risikoen i produksjons- og kontantstrømutsiktene.
- Tosifret fri kontantstrømavkastning over de kommende årene, der høyere oljepris og produksjonsvekst (i motsetning til Equinor og Vår Energi) støtter en attraktiv direkteavkastning.

B2 Impact (B2I)

- B2 Impact scorer høyt på kvantitative faktorer knyttet til inntjening og kursmomentum.
- Etter å ha redusert gjeldsgraden betydelig i årene etter pandemien har selskapet en sterk balanse og er godt posisjonert for lønnsomme investeringer.
- Den lave gjeldsgraden legger til rette for en utdelingsgrad på nær 100% og en attraktiv direkteavkastning på 10%.

Borregaard (BRG)

- Borregaard er et høykvalitetsselskap som opererer i et nisjemarked med få konkurrenter, dette gir selskapet sterk prisingsmakt.
- Siden august 2025 har aksjeprisen falt 30%, dette har vært drevet av negative revideringer av EPS-estimater for 2026, men med et større fokus på neste års inntjening og en solid Q2-rapport, har revisjonsendringene stabilisert seg for 2027.
- Attraktiv profil med vekst til en fornuftig pris. De har sterk EPS-vekst og en utbytteavkastning som ifølge Bloomberg konsensus skal øke fra 3.1% i 2026 til 4.3% i 2028.

DOF Group (DOFG)

- Siden slutten på mars har kursen beveget seg sidelengs til tross for at konsensusestimatene for 2027 EPS trekker oppover. Det langsiktige kursmomentumet er fremdeles positivt.
- En sterk ordrebok gir god visibilitet i fremtidig inntjening. Vi estimerer en gjennomsnittsoljepris for 2026 på USD91/fat og USD80/fat for 2027, som burde gi økt prisingsmakt mot oljeselskapene.
- Aksjen handler på attraktive nivåer med 12-måneders direkteavkastning på 12% og 12-måneders P/E på 8x.

Elkem (ELK)

- Elkem produserer silisiumprodukter med noen av markedets laveste produksjonskostnader bla. på grunn av lokasjonen i Nord-Norge (NO4). Industrikonsulenten CRU anslår at nær 70% av silisiumprodusentene produserer med tap ved dagens lave priser.
- CRU forventer at silisiumetterspørselen i snitt vil vokse med 5% i perioden 2026-2030, samtidig kan foreslåtte beskyttelsestiltak fra EU begrense veksten i tilbudet av silisium.
- En normalisering av silisiumprisene mot mid-cycle-nivåer vil løfte Elkems inntjening tilbake til mer normale nivåer og støtte en høyere verdsettelse.

Equinor (EQNR)

- Med stor usikkerhet rundt konflikt i Midtøsten fungerer Equinor som en sikring i porteføljen dersom uroen vedvarer utover høsten. Energisektoren utgjør om lag 22 prosent av OSEBX, men målt mot Equinors indeksvekt vil porteføljen fortsatt være undervektet aksjen.
- En høyere oljepris øker sannsynligheten for oppjusteringer i EPS-estimatene, etter en periode preget av moderate estimatkutt.
- Risikoen for en ny oppgang i oljeprisen har økt. Strategiske oljelagre er redusert, samtidig som et stengt Hormuzstred og usikkerhet knyttet til trafikken gjennom Rødehavet kan begrense tilbudet.

Kitron (KIT)

- Etter skuffelsen over at Kitron ikke oppjusterte guidingen, har aksjekursen falt kraftig, til tross for stigende EPS-estimater og en moderat oppjustering 24. august.
- Kitron er eksponert mot flere markedssegmenter med sterk vekst, blant annet elektrifisering, forsvarsteknologi og industrielle IoT-løsninger.
- Vi mener aksjen fremstår attraktiv, både med tanke på vekstutsikter og verdsettelse.

Mowi (MOWI)

- Sterk volumvekst i 2025 og 2026 har presset priser og inntjening ned, men dette kan gi grunnlagt for bedre inntjening fremover da lavere laksepris gjør det lettere å utvikle nye markeder. Lavere volumvekst og vedvarende god etterspørsel i 2027 understøtter økte laksepriser og sterk inntjeningsvekst for Mowi.
- Mowi er geografisk og mht. verdikjeden det mest diversifiserte sjømatselskapet på Oslo Børs. Til tross for en svak utvikling så langt i år, er den langsiktige trenden fremdeles positiv.
- Prisingen er attraktiv med en P/E på 14x og en direkteavkastning på ~5%.

Nordic Semiconductor (NOD)

- Utrullingen av neste generasjons nRF54-produktlinje skal akselerere veksten fra 2026 og fremover, og DNB Carnegies estimater ligger over konsensus på mellomlang sikt.
- Rom for marginekspansjon da kostnadsbasen er dimensjonert for større salgsvolumer.
- Texas Instruments oppkjøp av konkurrenten Silicon Labs avdekket at flere selskaper var involvert i budprosessen på verdsettelser godt over Nordic Semiconductors nivå. Det gir verdsettelsesstøtte og antyder at selskapet også kan være et oppkjøpsmål for M&A.

Salmar (SALM)

- Salmar er et selskap med sterk operasjonell historikk og guidingen etter Q2-tallene bekrefter en positiv volum- og kostnadsutvikling.
- Sesongmønsteret i sjømatsektoren har endret seg, og har de siste årene gjort det bedre i Q3–Q4 enn i den historisk sterkere perioden Q4-Q1.
- Vi vurderer verdsettelsen som attraktiv med en 24-måneders forward P/E på 14x, gode vekstutsikter for EPS i 2027e og en direkteavkastning på 4%.

Property rights
This research report is for clients only, and not for publication, and has been prepared for information purposes by DNB Carnegie.

This research report is the property of DNB Carnegie. DNB Carnegie retains all intellectual property rights (including, but not limited to, copyright) relating to this research report. Sell-side investment firms are not allowed any commercial use (including, but not limited to, reproduction and redistribution) of this research report contents, either partially or in full, without DNB Carnegie’s explicit and prior written consent. However, buy-side investment firms may use this research report when making investment decisions, and may also base investment advice given to clients on this research report. Such use is dependent on the buy-side investment firm citing DNB Carnegie as the source.

This research report does not constitute investment advice
This research report is made for information purposes only, and does not constitute and should not in any way be considered as an offer to buy or sell any securities or other financial instruments or to participate in any investment strategy. This research report has been prepared as general information and is therefore not intended as a personal recommendation of particular financial instruments or strategies, and does not constitute personal investment advice. Investors should therefore make their own assessments of whether any of the trading ideas described herein are a suitable investment based on the investor’s knowledge and experience, financial situation, and investment objectives.

Risk warning
The risk of investing in financial instruments is generally high. Past performance is not a reliable indicator of future performance, and estimates of future performance are based on assumptions that may not be realised. When investing in financial instruments, the value of the investment may increase or decrease, and the investor may lose all or part of their investment. Careful consideration of possible financial distress should be made before investing in any financial instrument.

Analyst certification
The research analyst(s) responsible for the content of this research report certify that: 1) the views expressed in this research report accurately reflect that research analyst’s personal views about the company and the securities that are the subject of this research report; and 2) no part of the research analyst’s compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in this research report. DNB Carnegie employees, including research analysts, may receive compensation that is generated by overall firm profitability.

Potential conflicts of interest
DNB Carnegie may from time to time perform investment banking or other services for, or solicit investment banking or other business from, any company mentioned in this report. DNB Carnegie and any of its officers or directors may have a position, or otherwise be interested in, transactions in securities that are directly or indirectly the subject of this news comment. Further information on potential conflicts of interest may be found at DNB Carnegie' website (dnb.no/disclaimer/MAR).

DNB Bank ASA, its affiliates and subsidiaries are engaged in commercial banking activities, and may for example be a lender to any company mentioned in this news comment. This means that certain parts of these entities might have access to whatever rights and information regarding addressed companies as are available to a creditor under applicable law and the applicable loan and credit agreements.

DNB Carnegie and the rest of DNB Group have implemented a set of rules handling conflicts of interest. This includes confidentiality rules restricting the exchange of information between various parts of DNB Carnegie and the rest of DNB group. In order to restrict flows of sensitive information, appropriate information barriers have been established between the Investment Banking Division and other business departments in DNB Carnegie, and between DNB Carnegie and other business areas in the DNB Group. People outside an information barrier may gain access to sensitive information only after having observed applicable wall-crossing procedures. This means that employees of DNB Carnegie who are preparing the Reports are prevented from using or being aware of information available in other parts of DNB Carnegie or DNB Group that may be relevant to the recipients' decisions.

The remuneration of employees involved in preparing this news comment is not tied to investment banking transactions performed by DNB Carnegie or a legal person within the same group.

Confidential and non-public information regarding DNB Carnegie and its clients, business activities and other circumstances that could affect the market value of a security ("sensitive information") is kept strictly confidential and may never be used in an undue manner. Internal guidelines are implemented to ensure the integrity and independence of research analysts. In accordance with the guidelines, the research department is separated from the Investment Banking department and there are no reporting lines between the research department and Investment Banking. The guidelines also include rules regarding, but not limited to, the following issues: contacts with covered companies, prohibition against offering favourable recommendations, personal involvement in covered companies, participation in investment banking activities, supervision and review of news comments, analyst reporting lines, and analyst remuneration.
